Color Correction Lens Selection Guide

Use this guide to find out more about EnChroma's lenses and identify which ones are right for your child. Glasses are funded by the Jones Family Redirecting the Light Fund, in Honor of Joan Foley, through a partnership with Southwest Initiative Foundation and EnChroma.

STEP 1: TAKE THE ENCHROMA COLOR BLINDNESS TEST

Before you select an EnChroma lens and frame, take the online test to determine your type of color blindness: <https://enchroma.com/pages/test>. This will guide you in choosing the ideal lens. Next, read below and reference your test result to select the best lens and frame option.

STEP 2: ABOUT ENCHROMA INDOOR AND OUTDOOR GLASSES

EnChroma's two lens options are designed to work in specific environments (indoors or outdoors). There is not one lens option that works equally well in both environments (indoors and outdoors) nor a "transition" lens. Please first decide the environment in which you will gain the most benefit from wearing EnChroma glasses.

ENCHROMA LENS TYPES

EnChroma Cx3 Outdoor Lenses are designed to enhance color vision outdoors in bright sunlight or partly cloudy conditions. The Cx3 Sun is optimal for most types of Deutan and Protan color blindness. EnChroma offers a special Cx3 Sun SP only for those whose test result is Strong Protan.

EnChroma Cx1 Indoor Lenses are designed to be used in typical indoor lighting conditions to enhance color vision while performing activities such as schoolwork, cooking, watching movies, browsing the web, and art projects. The Cx1 lens is tuned for those whose color blindness test moderate to strong Protan. The Indoor Cx1 DT is for all types of Deutan color blindness and mild Protan test results.

For more details, review the lens guide at <https://enchroma.com/pages/lens-guide>

STEP 3: CHOOSE GLASSES BASED ON TEST RESULT & USE ENVIRONMENT

Indoor EnChroma Glasses

Indoor glasses Ages 5-10

Deutan (mild, moderate or strong) color blindness test result

Select Indoor Universal Durant (Age 5-10)

<https://enchroma.com/products/durant-black-indoor-universal-plano>

Indoor glasses Ages 8+

Protan (moderate or strong) color blindness test result

Select Indoor Universal Skypark (age 8+)

<https://enchroma.com/products/skypark-black-indoor-universal-plano>

Indoor glasses Ages 10+

Deutan (mild, moderate or strong) and Protan (mild only) color blindness test result

Select Indoor Universal Grayson

<https://enchroma.com/products/grayson-matte-black-indoor-universal-plano>**Outdoor**

EnChroma Glasses

Outdoor glasses Ages 5-10

Protan (strong) color blindness test result

Select Outdoor Deutan Durand (Age 5-10)

<https://enchroma.com/products/durant-black-outdoor-deutan-plano> or

Select 'Cx3 Outdoor Deutan Ellis

<https://enchroma.com/products/ellis-smooth-black-outdoor-deutan-plano> or

Outdoor Protan Ellis

<https://enchroma.com/products/ellis-smooth-black-outdoor-protan-plano>

STEP 4: REQUEST PRESCRIPTION, IF NEEDED

EnChroma can include a prescription for another vision issue in our lenses. To get EnChroma glasses with your prescription please follow the steps for uploading it via the SWIF system.

Delivery of glasses with an Rx could take an additional 4-8 weeks.

HOW TO BUY SECOND PAIR OF ENCHROMA GLASSES

The pair of EnChroma glasses you choose is designed to work in a specific lighting environment (indoors or outdoors, but not both). If you want to buy a pair of glasses for use in another environment, EnChroma will offer the opportunity to do so at 50 percent off the regular price listed at enchroma.com. Email Southwest Initiative Foundation staff Nancy Fasching at nancyf@swifoundation.org for information about the process.

QUESTIONS?

For common questions about EnChroma glasses, lens types and more, visit
