

## **How do I know if my child is colorblind and this opportunity if for me?**

### **Step 1: TAKE THE ENCHROMA COLOR BLINDNESS TEST**

Before you select an EnChroma lens and frame [click here](#) to take our color blind test to determine your type of color blindness. This will guide you in choosing the ideal lens. Next, read below and reference your test result to select the best lens and frame option.

### **Step 2: ABOUT ENCHROMA INDOOR AND OUTDOOR GLASSES**

EnChroma's two lens options are designed to work in specific environments (indoors or outdoors). There is not one lens option that works equally well in both environments (indoors and outdoors) nor a "transition" lens. Please first decide the environment in which you will gain the most benefit from wearing EnChroma glasses.

#### **ENCHROMA LENS TYPES**

**EnChroma Cx3 Outdoor Lenses** are designed to enhance color vision outdoors in bright sunlight or partly cloudy conditions. The Cx3 Sun is optimal for most types of Deutan and Protan color blindness. EnChroma offers a special Cx3 Sun SP only for those whose test result is Strong Protan.

**EnChroma Cx1 Indoor Lenses** are designed to be used in typical indoor lighting conditions to enhance color vision while performing activities such as schoolwork, cooking, watching movies, browsing the web, and art projects. The Cx1 lens is tuned for those whose color blindness test moderate to strong protan. The Indoor Cx1 DT is for all types of Deutan color blindness and mild protan test results.

For more information and details, review our **Lens Guide**:

Outdoor glasses

Adult or adult-sized head

Protan (Strong) color blindness test result

Select 'Cx3 Ellis Sun SP' frame:

<https://enchroma.com/collections/outdoor>

#### **STEP 4: Prescription Needed in EnChroma Lenses?**

EnChroma can include a prescription for another vision issue in our lenses. To get EnChroma glasses with your prescription please follow the steps for uploading it via the SWIF system. Delivery of glasses with an Rx could take an additional 2-4 weeks.

#### **Video the Moment**

Jonathan would appreciate it if you would video the first time your child first tries his/her EnChroma glasses and email it to [jonathangofundme@gmail.com](mailto:jonathangofundme@gmail.com) to upload the video to his GoFundMe site and to [pr@enchroma.com](mailto:pr@enchroma.com).

#### **How to Buy Second Pair of EnChroma Glasses**

The pair of EnChroma glasses you choose is designed to work in a specific lighting environment (indoors or outdoors but not both). That is, if you choose indoor glasses they are not designed to deliver benefits in outdoor lighting conditions and vice-versa. If you want to buy a pair of glasses for use in another environment EnChroma will offer the opportunity to do so at 50% off the regular price listed at [enchroma.com](http://enchroma.com). If you want to buy a second pair you may do so by contacting SWIF at [nancyf@swifoundation.org](mailto:nancyf@swifoundation.org) for information about the process.

#### **QUESTIONS? FAQs:**

For common questions about EnChroma glasses, lens types and more, please first visit: <http://support.enchroma.com/support/home>. For any questions not answered in our FAQs, please call 510.497.0048 or email [support@enchroma.com](mailto:support@enchroma.com). Thank you!
