

RESOURCES TO NAVIGATE UNCERTAINTY

The work of Minnesota's charitable nonprofits covers a wide range of causes and efforts that make our state and region an amazing place to live, work, and play. Executive orders and drastic policy changes enacted by the new federal administration have adversely impacted funding, staffing, and general operations of critical community services in Minnesota and beyond.

During times of crisis, it is important that nonprofits focus on key levers of organizational stability: strong internal controls; sustainable revenue mix; strategic HR; ethical leadership. Founded specifically to provide support and guidance for the state's nonprofits, the **Minnesota Council of Nonprofits** is here to help ensure your organization has what it needs to effectively advance your important mission during times of uncertainty.

MCN continues to aggregate timely and sector-relevant resources and updates to help you answer complex questions that arise, build and maintain the strongest possible foundation, and forge a path towards success both in times of challenge and opportunity. As the evolving situation requires, we will work to keep your organization informed and equipped to weather any storm.

MINNESOTA
COUNCIL OF
NONPROFITS

The Minnesota Council of Nonprofits (MCN) was founded in 1987 to meet the growing information needs of nonprofits and to convene nonprofits to address issues of common concern to all.

The largest statewide association of nonprofits in the nation, MCN accomplishes its mission in five ways:

1. Education and professional development for nonprofit managers and leaders;
2. Public policy education and civic engagement;
3. Research on nonprofit sector trends and tax and budget issues;
4. Advocacy at local, state, and federal levels; and
5. Cost saving product partnerships.
